

Hackers wanted!

We are looking for experienced hackers to join our core team here in Innsbruck (also 100% remote possible).

Security Consultant / Penetration Testing Engineer (Part-time) (m/f/d)

We are looking for experienced Ethical Hackers with the following skills:

- Several years of professional experience in software development, security consulting or penetration testing
 - A lateral entry into the world of "hacking" is also possible!
- Very good analytical skills
- A team player that has the ability to work both independently and collaboratively on complex problems.
- Basic knowledge of penetration testing (web and mobile applications, IoT, hardware, etc.)
- Experience writing and reading one or more of the following programming languages: Java / .Net / PHP / Ruby / Rust / Go / C / C++
- Strong interest in "cutting-edge" technologies and the right "hacker" mindset ("how to break things")
- Skills in writing and speaking in German and English
- Optional, depending on suitability and previous experience: Vulnerability research & exploit development

The following would be nice to have but is not a basic requirement:

- Reverse Engineering skills
- Basic knowledge of cryptography
- Knowledge in the field of blockchain technologies
- Diploma/Master's/Bachelor's degree in computer science/IT security
- OSCP/OSCE certifications

We offer you:

- A thorough induction into the company
- Personal mentor for the first months
- Opportunity to work in a very interesting and varied field
- Insights into a wide range of technologies, working on exciting and challenging projects at companies of all sizes and industries
- Great colleagues and team atmosphere
- Opportunities for continuous education and hacking / security conferences attendance (worldwide)
- Modern workplace environment + own budget for workplace design
- Flexible working hours
- Flexible home office arrangement
- Employee car parking
- Other employee benefits such as meal vouchers, free drinks and snacks

About us:

RootSys GmbH was founded by security experts with more than 15 years of experience in the field of information security. We provide high quality security services including penetration testing, code audits, security consulting in the field of AppSec, cryptography, cloud security and IoT / firmware.

Flexible hours are possible for this position. At 38.5 hours per week, the gross annual salary starts at € 42,000. This is the minimum wage according to the collective agreement, the actual compensation is of course based on your qualifications and position-relevant professional experience. Please send us your complete application documents (CV with photo, certificates, etc.) by e-mail to careers@rootsys.at.

We are looking forward hearing from you.
